SELVE HOME SERVER 2

Integration of IP-cameras

via an ivideon account

Inhalt

1. General

The SELVE Home Server 2 enables the integration of a IP camera via the cloud provider ivideon. For this purpose, the ivideon cloud is connected to the SELVE Home app via the SELVE cloud. A direct integration via the camera manufacturer is not possible. The function was checked by SELVE with the manufacturers Nobelic and OCO. A possible source of supply is: https://shop.ivideon.com/collections/network-cameras.

In order to be able to integrate the IP camera, an account must be created with ivideon as well as with SELVE. The creation of a SELVE account can be found in the quick guide SELVE Home Server 2. The ivideon account can either be created on the website www.ivideon.com or in the ivideon app.
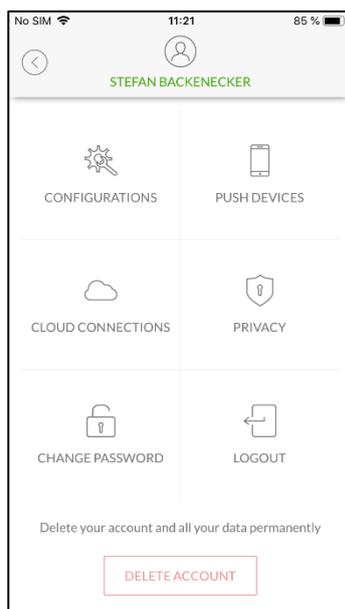

In order to integrate cameras to ivideon, follow the instructions on the ivideon website or in the ivideon app.

## 2. Allow app to access the ivideon account

Sign in at SETTINGS → ACCOUNT and mark „Stay logged in" so that the cloud connection to the app will not be closed.
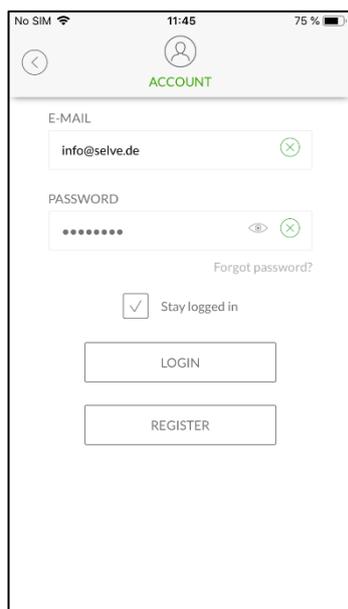

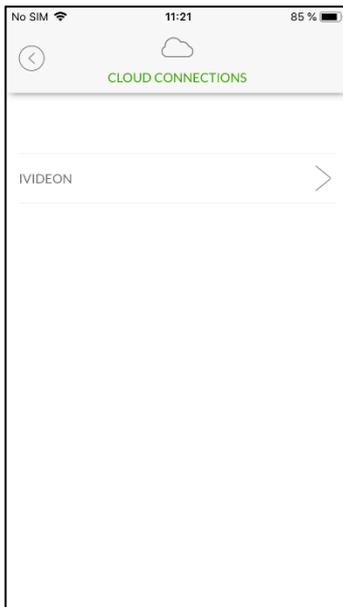

|		
Sign in with your account and confirm „Stay logged in".	Select „CLOUD CONNECTIONS"	Press „+" for the addition of a connection.

„Select IVIDEON".

Allow the SELVE app to access to the ivideon account. Press „AUTHORIZE". A browser window opens.
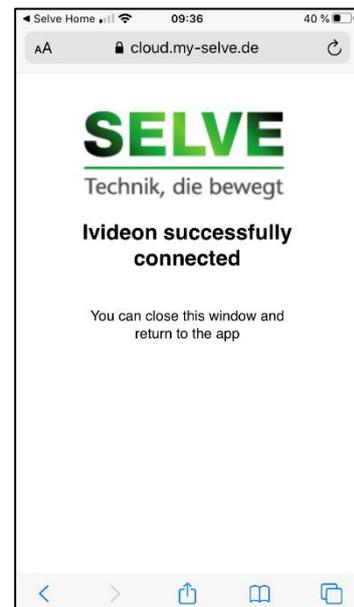

Enter the login data for the Ivideon account and log in.
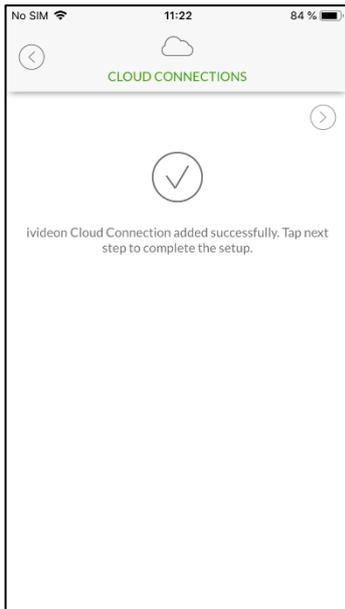

Scroll down in the permission list.

Allow the SELVE Home app the access, press „ALLOW".

The permitted access will be confirmed.

Now switch from the browser to the SELVE Home app to continue the installation.

The app confirms the connection, press „>" to continue.

Now press „<" to get back to the main menu.
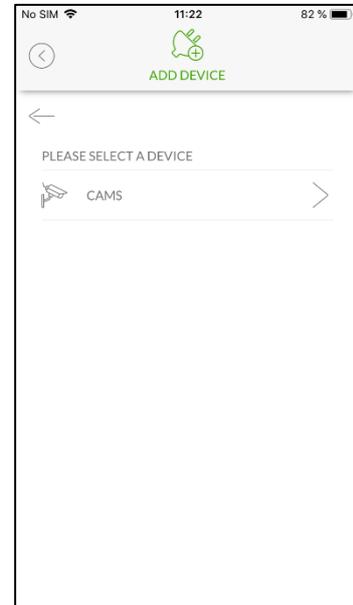

3. Integration of IP-cameras into app

The cameras that are available via the idideon account, have to be added in the app. Fort hat purpose, call up the menu SETTINGS -> ADD DEVICES.
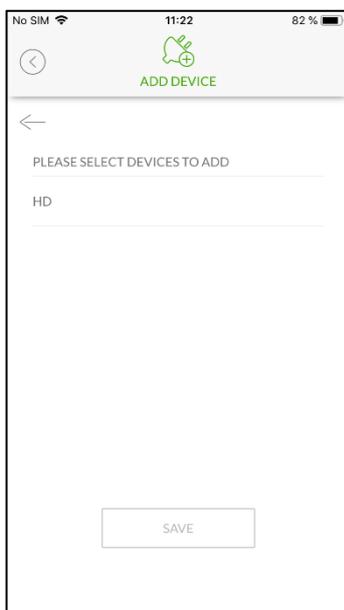

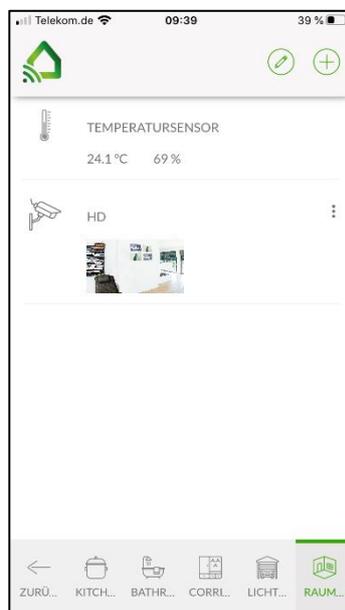

Call up the menu „ADD DEVICE"   Select „IVIDEON".   Select „CAMERAS".

By taping on the cameras, select which cameras should be added and press „SAVE".

The new cameras can now be found at „ROOMLESS DEVICES".
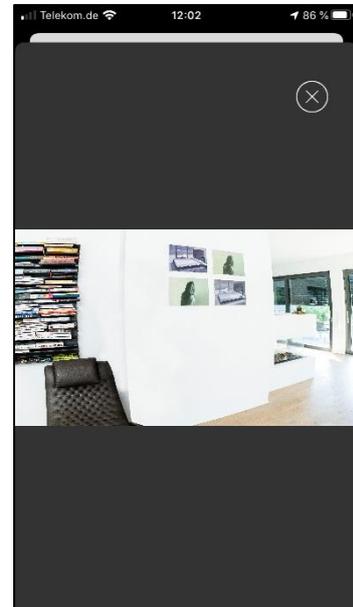

4. Camera view in the app

The live image in the app can be displayed larger if requested. To do this, call up the room to which the camera is assigned.

Call up room with the camera and tap on the picture.

The live image will be opened.

To close the live image, tap on the image, the symbol „X" will pop up. Press „X" to close the view.

5. Delete ivideon account connection

To delecte the connection of the app with the ivideon account, go to ACCOUNT -> CLOUD CONNECTION -> ivideon and tap on „DELETE". After that confirm the safety message. The connection of the app to the ivideon account is deleted.
